Soft Skills

- Assertive communication
- Teamwork
- Problem solving
- Critical thinking
- Time management
- Taking criticisms

Languages

Spanish: Native.

English: TOELF B2.

Professional Interests

Software Development

- Front End.
- Back End.
- Data Analysis.

Academic Record

ULACIT

Baccalaureate in computer engineering

Technical Skills

- Object-oriented programming
 - Java
 - Python
 - C#
- Web Development
 - HTML
 - JavaScript
 - CSS
- Relational Databases:
 - SQL Server
 - MySQL
 - Oracle
 - PostgreSQL
- Non Relational Databases:
 - MongoDB
- Agile software development:
 - Scrum.
 - CI/CD Process

Projects

Divudichi Project

Divudichi was a project about a restaurant developed in the university stage. The objective of the project was to deliver a dynamic web page, with a database and an API that maintained a specific operation.

My role within the work group was not only limited to developing the software because I was also in charge of managing the work group, assigning tasks to the other team members, solving communication problems and maintaining direct communication with the professor.

Used technology**FrontEnd:**

- React
- HTML
- CSS
- JavaScript

BackEnd:

- C#
- .Net
- ASP. Net

Database:

- SQL Server

Methodology:

- Scrum

Elancer Project

Elancer was one of the last projects done at the university. The objective of this project was to create a responsive web page so that people who want to be a freelancer have a space where they can publish their work and be seen by companies.

In addition to helping in the development of the website, I also fulfilled various functions such as planning weekly meetings, carrying out tests to see if the page met all the requirements and features.

Used technology**FrontEnd:**

- React
- HTML
- CSS
- JavaScript

BackEnd:

- Ruby on Rails

Database:

- PostgreSQL

Methodology:

- Kanban
